

ADZRIL ILHAM RAMADHAN

SOFTWARE ENGINEERING

Bekasi, West Java, 17610 | adzril774@gmail.com | +62 821-1432-7524

SUMMARY

Detail-oriented Software Engineering student at Universitas Pendidikan Indonesia with core competencies in Data Analytics, Data Engineering, and Full-Stack Web Development. Experienced in building database-driven web platforms (Laravel, React, Supabase) and object-oriented software (Java, Python, C++). Proven collaborative problem-solver seeking an internship opportunity to deliver impactful, scalable technical solutions.

AREA OF EXPERTISE

Full-Stack Web Development	Object-Oriented Programming (OOP)	UI/UX Design & Prototyping
Database & Data Modeling	Data Analysis & Processing	Cross-Functional Team Collaboration

EXPERIENCE

Full-Stack Developer | Personal & Academic Project

2024 - Present

- ToDoo (Task Management App): Engineered a responsive web-based productivity app featuring real-time CRUD operations, state management, and relational database integration using modern web frameworks.
- CleanWash (Collaborative Laundry Platform): Co-developed an end-to-end service management platform with an academic team utilizing Laravel and MySQL to streamline order tracking and operations.
- Smart Parking Management System: Architected an OOP-based desktop application applying encapsulation, inheritance, and dynamic state management to automate slot allocation and fee calculation.

Staff of Advocacy Department | HIMA RPL UPI

Feb 2025 - Feb 2026

- Facilitated communication between students and faculty leadership to resolve academic and departmental concerns.
- Led logistics as Head of Logistics Division for the 4th Software Engineering Anniversary, managing equipment procurement and venue operations.
- Served as Event Coordinator & MC for the Goes To School (GTS) outreach initiative, driving interactive sessions for prospective students.

EDUCATION

Universitas Pendidikan Indonesia (UPI)

Nov 2024 - 2028

- Bachelor of Software Engineering (Rekayasa Perangkat Lunak)
- Current GPA: 3.75 / 4.00
- Relevant Coursework: Object-Oriented Programming, Database Systems, Web Application Development, Data Structures & Algorithms.

SKILL & INTEREST

- Technical Skills:** Python, JavaScript, Java, C++, SQL, React, Laravel, MySQL, Supabase, Git, GitHub.
- Interests:** Data Engineering, Data Analytics, Scalable Web Systems, Product Design, Open-Source Technologies.
- Languages:** Indonesian (Native), English (Professional Working Proficiency).
